

Jennifer Lo

Applied AI and analytics leader with 7+ years of experience leading global enterprise AI adoption, analytics modernization, and automation. Experienced in identifying high-value AI opportunities, governing enterprise platforms, and delivering solutions that improve operational efficiency and decision-making.

Skills

AI Platforms: ChatGPT Enterprise, Amazon Q Business, ToltIQ, Copilot Studio, PowerApps, Gemini, Claude

AI Concepts: Prompt Engineering, Retrieval Augmented Generation (RAG), Agentic AI, AI Assisted Development & Prototyping, AI Governance, Adoption & Best Practices

Automations: UI Path, Alteryx

Data Analytics & Visualization: Alteryx, Snowflake, Tableau, PowerBI, Python, SQL, VBA, ACL

Completed Certificates:

OpenAI Applied AI Foundations, OpenAI Agents & Workflows, Claude 101, Claude Code 101

Education

University of Waterloo, Canada
Bachelor of Computing and Financial Management
Computer Science and Finance Double Major
Sep 2013 – Apr 2018

Schola Academy, Italy
Leatherwork and Bag Design
Jul 2024

Debloo Studio, Thailand
Bag Design and Luxury Finishes
Jan 2026

Professional Experience

AI Manager and Product Owner

Brookfield – Technology Services | New York, United States | Nov 2024 – Dec 2025

- Established and executed enterprise-wide adoption and governance of AI tools. Managed admin, user onboarding, training, billing, governance, troubleshooting and consultation of:
 - ChatGPT** – Led enterprise rollout to 1000+ users from Apr 2025 to Sep 2025. Providing ongoing enablement programs and support processes accelerating responsible enterprise AI adoption
 - ToltIQ** – Enabled 600+ investments and private equity users to increase due diligence efficiency starting Feb 2025. Provided ongoing onboarding, training, prompt writing, usage consultation, maintained prompt library, lead knowledge sharing and feature requests requirements sessions
 - Amazon Q Business** – Enabled 100+ users over across HR, audit, finance and tax, assisted with setting up team environments and RAG data sources starting Nov 2024. Worked with individuals in creating Q apps, prompt writing, assessing and fostering use cases like maternity leave app, resume match analysis and audit report editor. Worked with Amazon engineers to troubleshoot, improve and suggest features, and provided user experience recommendations
 - Scribe** – Enabling 100+ users to modernized documentation tool and sharing, starting Dec 2024
- Lead 100+ technical and educational demos, established and presented best practices and prompt engineering to raise AI literacy and adoption across business groups and levels of staff
- Participated and contributed to organization-wide, local and global AI-VCO objectives and initiatives, providing and collating quarterly updates, use case and progress tracking
- Partnered with Amazon and PwC on AI-driven solutions that accelerate decision-making and operational efficiency across corporate functions:
 - HR Invoice Redaction and Processing – Agentic AI process to ingest and redact invoices
 - Pre-Meeting Report App – MS PowerApp report generation for client/investor-facing executives with data from Salesforce and Prequin
 - Due Diligence Questionnaire – MS PowerApp to assist compliance to extracting responses
- Drove organization-wide AI value creation by prioritizing use cases, requirements gathering and documentation, delivering proof of concepts, assessment of viability and business alignment
- Participated in Snowflake x AWS hackathon to develop a Streamlit app with Cortex Analyst on multimodal real estate data to create an industry-specific, UI/UX-minded research tool

RPA Developer

Brookfield – Technology Services | New York, United States | Aug 2024 – Nov 2024

- Deployed automations with UI Path to reduce manual processes and increase accuracy:
 - Updated existing Legal document ingestion automation for two new document formats
 - Created automation of quarterly rollover of financial statement trackers
 - Troubleshoot and resolved production ad-hoc automation failures
- Refactored and maintained data remediation Python code for Relito

Data Analytics and Visualization Manager

Brookfield – Internal Audit | New York, United States | May 2024 – July 2024

Brookfield – Internal Audit | Sydney, Australia | Nov 2022 – Mar 2024

- Modernized audit analytics through Alteryx migrations and redesigned Tableau dashboards, enabling scalable self-service compliance reporting and executive insights

Data Analytics and Visualization Manager / Senior Analyst / Analyst

Brookfield – Internal Audit | Toronto, Canada | Sep 2018 – Nov 2022

- Lead and delivered enterprise audit analytics and compliance monitoring while driving automation and modernization using Alteryx, Tableau, VBA, and ACL

Side Projects

[Demos in Google Drive](#)

Leather Bag CAD Pattern Editor (<https://jkw2lo.github.io/awl-gusset/>)

Claude | Aug 2026

- Designed and refined a parametric CAD tool for generating custom bag patterns, employing 2D/3D rendering visualizations, adjustable dimensions, cut-piece patterns, stitch-marking optimization, hardware specifications, and direct manipulation of design elements
- Built multiple pattern views, including customizable PDF exports capturing production-ready references and automated pattern verification checks to identify potential construction issues
- Refined the user interface and experience with intuitive menus, selectors and drag-and-drop manipulations to easily visualize customizations. Incorporated easy-to-reference views and details to allow user to iteratively design and validate a bag pattern without prior CAD experience

Intelligent Trip Planner and Organizer (https://jkw2lo.github.io/trip_planner/)

Claude | Aug 2026

- Designed a comprehensive drag-and-drop system combining itinerary building, activity discovery, logistics, optimization, and trip organization into an intuitive and practical visual workspace
- Created a centralized management of hotels, transportation, reservations and notes; designed to allow for flexible planning and rescheduling
